

# CONVERSATION, COGNITION AND LEARNING

## A Cybernetic Theory and Methodology

GORDON PASK

*System Research Ltd., Richmond, Surrey*

With appendices by B.C.E. Scott and D. Kallikourdis, glossary by  
M. Macdonald-Ross and index by B.C.E. Scott

*To Elizabeth, Amanda and Hermione*

## Contents

Preface	IX
Introduction	1
Chapter 1. Preliminaries	13
1. Observation and Regulation	13
2. Steady State Technique: Relativistic Systems	24
Chapter 2. Relativistic Systems	35
1. Stable Learning	35
2. Specific Additional Constraints on the SST System	37
3. Types of Learning and Teaching Theory	40
4. A Macro Theory of Stable SST Interactions	41
5. A Micro Theory of Learning and Teaching	44
Chapter 3. Some results obtained by realising the cooperative externalisation technique with the aid of a participant experimenter	51
1. Introduction	51
2. Experiments	52
Chapter 4. A realistically sized conversational system	71
1. The CASTE facility	78
2. Overview of the system and its rationale	89
3. The CET heuristic	104
4. Typical data about learning strategies	108
5. Explanations and demonstrations as modelling operations on STATLAB	109
6. Uncertainty measures and strategy types	124
7. Macro grain control variables	127
8. The uncertainty regulation (tutorial conversation) heuristic	130
9. More intimate types of tutorial conversation heuristic	134
10. Simple feedback regulated instruction	135
11. The gross effect of learning conditions upon performance	136
Chapter 5. Conversation Theory	141
Section 1. Conversations, models and individuals	141
1. Contracts	141
2. Occasions and understanding	141
3. Strict conversations and the CET heuristic	142
4. Details	143
5. Extensions of the strict conversation	143
6. Reasons for developing a theory of conversations	144
7. Foundations	145
8. Individuals	164
Section 2. Conversation theory, external observers and participants	170
1. Use of the conversational object language	171
2. Conversational skeleton	173
3. Properties of the conversational skeleton	182
4. Minimal form of conversational skeleton	184

5. Concepts and memories: Reproduction, construction, and understanding . . . . .	186
6. M Individuation . . . . .	205
7. Embodiment . . . . .	207
8. Measurement . . . . .	211
Chapter 6. Strict conversations, heuristics, and classes of experiment . . . . .	213
1. The cooperative externalisation technique . . . . .	214
2. Other strict conversations. The uncertainty regulation heuristic . . . . .	225
3. Paradigms for experimental situations . . . . .	232
Chapter 7. Construction of a general conversational domain . . . . .	241
1. Specification of a conversational domain . . . . .	241
2. Constraints on dialogue and teachback . . . . .	244
3. Relations as sets (relations in extensional form) and relations as concepts (in intensional form) . . . . .	257
4. Relational operators . . . . .	263
5. Transition from a relational network to an entailment mesh . . . . .	264
6. The form of entailment meshes . . . . .	270
7. Cyclic meshes . . . . .	275
8. Pruning . . . . .	281
9. The L <sup>0</sup> description . . . . .	287
10. The L <sup>1</sup> description of R . . . . .	289
11. Overview of some extensions of entailment meshes and the course assembly process . . . . .	293
12. Other methods of representing knowables . . . . .	299
13. Questions . . . . .	320
14. The advantages and disadvantages of redundancy . . . . .	322
15. Types of taxonomy learning . . . . .	323
16. Restrictions on the form of entailment structures . . . . .	327
Chapter 8. A currently mechanised form of the course assembly heuristic . . . . .	329
1. Outline . . . . .	329
2. Preliminaries . . . . .	330
3. The heuristic . . . . .	332
4. More basic limitations . . . . .	335
Chapter 9. Task structures and modelling facilities . . . . .	337
1. Laboratories . . . . .	338
2. Some laboratory like modelling facilities . . . . .	349
3. Games and control situations . . . . .	364
4. Identification with non-standard game theories . . . . .	374
5. An interlude: Interpersonal test measures . . . . .	388
6. Modelling Facilities for tasks involving interpersonal interaction . . . . .	393
Chapter 10. Application and possible applications of the theory . . . . .	395
1. Entailment structures . . . . .	395
2. Individual tuition materials . . . . .	395
3. Examination design . . . . .	397
4. General uses . . . . .	398
5. Gross properties of knowables . . . . .	399
6. Teaching teachers . . . . .	402

7. General orientation . . . . .	402
8. Augmenting brains . . . . .	404
Chapter 11. Consciousness, self-reference, and some tentative relations between the microtheory and the macrotheory . . . . .	407
1. Consciousness and synchronicity . . . . .	407
2. External observers . . . . .	408
3. Macrotheories . . . . .	410
4. Subjective uncertainty . . . . .	413
5. Forms of awareness distinguished in terms of the macro-variables . . . . .	424
6. A construction for a self-conscious participant . . . . .	432
7. A construction for limited veridical statements . . . . .	434
8. Broader interpretations . . . . .	435
9. Mutual models of student and teacher . . . . .	436
10. Embodiment in an interface processor . . . . .	437
11. Practical realisation in group tutorials . . . . .	438
Appendices . . . . .	
A . . . . .	439
B . . . . .	443
C . . . . .	451
D . . . . .	455
E . . . . .	459
F . . . . .	463
G . . . . .	469
H . . . . .	485
I . . . . .	491
J . . . . .	497
K . . . . .	507
References . . . . .	541
Glossary . . . . .	551
Index . . . . .	565
